Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

1-5. (Canceled)

6. (Currently Amended) A method of treating a thrombotic disorder in an individual in need thereof comprising administering a therapeutically effective amount of an anti-human tumor necrosis factor— α alpha monoclonal antibody or antigen-binding fragment thereof to the individual, wherein the thrombotic disorder is selected from the group consisting of: a thromboembolic disorder, an ischemic event, stroke, acute myocardial infarction, deep vein thrombosis and thrombophlebitis.

7-8. (Canceled)

- 9. (Currently Amended) The method of claim 6, wherein the monoclonal antibody is selected from the group consisting of a humanized antibody or antigen-binding fragment thereof and a resurfaced antibody or antigen-binding fragment thereof.
- 10. (Currently Amended) The method of claim 6, wherein the $\underline{\text{monoclonal}}$ antibody binds to an epitope included in amino acid residues of about 87-108 (SEQ ID NO:1) or about 59-80 (SEQ ID NO:2) of $\underline{\text{hTNF}\alpha}$ human tumor necrosis factor- α .

11. (Canceled)

- 12. (Currently Amended) The method of claim 6, wherein the monoclonal antibody is a chimeric antibody, said chimeric antibody comprising (a) a non-human variable region specific for TNF tumor necrosis factor or an antigenbinding portion thereof and (b) a human constant region.
- 13. (Currently Amended) The method of claim 12, wherein the chimeric antibody binds to an epitope included in amino acid residues of about 87-108 (SEQ ID NO:1) or about 59-80 (SEQ ID NO:2) of $\frac{\text{hTNF}\alpha}{\text{human tumor necrosis factor-}\alpha}$.
- 14. (Previously Presented) The method of claim 12, wherein the chimeric antibody is monoclonal antibody cA2.
- 15. (Currently Amended) The method of claim 12, wherein the chimeric antibody competitively inhibits binding of $\overline{\text{TNF}\alpha}$ tumor necrosis factor- α to monoclonal antibody cA2.

16-50. (Canceled)

51. (Currently Amended) A method of treating a thrombotic disorder in an individual in need thereof comprising administering a therapeutically effective amount of an anti-human tumor necrosis factor— α alpha monoclonal antibody or antigen-binding fragment thereof to the individual, wherein the thrombotic disorder is deep vein thrombosis.

52. (Canceled)

53. (Currently Amended) The method of claim 6, wherein the
